Cynthia Riseling (P607) requests authority to sample up to 35 juvenile California sea lions (*Zalophus californianus*) annually for three years. Animals sampled will be from stranded rehabilitated stocks at marine mammal stranding centers in California. Three cultures will be taken from the skin, throat, and vaginal/urethral area to study the normal bacteria flora of this animal. If fecal samples are available, they will be collected. The question the applicant seeks to answer is are normal bacterial flora of these animals causing disease in humans?

David R. Young (P614) requests authority to import from Russia blubber, liver, muscle and composited seal blubber oil taken from Baikal seals (*Phoca sibirica*). Samples will be taken from eight carcasses which were either beached, stranded, or hunted under Russia's legal culling system from areas of Lake Baikal. The researchers seek to establish the level of toxic contaminants [PCBs; DDTs; PAHs; Organic Mercury; Trace Metals] in indicator tissues of the Baikal seal, and also components of the animal's food web.

Date: July 1, 1996.

Acting Chief, Permits and Documentation Division, Office of Protected Resources, Office of Protected Resources, National Marine Fisheries Service.
